4:00PM 'til . . .	Networking Reception (optional), <i>Schuylkill River National &amp; State Heritage Area</i>				

<b>AT-A-GLANCE: Watershed Tours Sunday, March 6<sup>th</sup> (Times &amp; Locations Vary)</b>		
<b>U. Black Rock Sanctuary</b> , <i>John Spencer, Jay Erb, and Robert Folwell</i> , Chester County Parks & Recreation. This on-site tour of the Black Rock Sanctuary project will demonstrate how Chester County improved wetlands, provided habitat for migrating waterfowl, and designed a ¼ mile educational interpretive trail.	<b>V. Making Buildings Fit With the Environment and Your Budget</b> , Heather Cowley, PA Department of Environmental Protection. This on-site tour will highlight design and materials features of the PA Department of Environmental Protection's new Southeast Regional Office focusing on the two stormwater technologies. The tour will also cover where to find cost trade-offs during the design phase and what some of the options are to incorporate some green aspects no matter what type of building.	<b>W. An Institutional Model for Creating Wetlands in Montgomery County, Pennsylvania</b> , <i>Erony Whyte</i> , Ursinus College. This on-site tour takes you to a wet-pond retrofit of a campus detention basin. The tour will address the model this project provides for creating wetlands at academic institutions in a highly developed environment. This retrofit project successfully combines academic, professional, and organizational management goals for all involved participants, resulting in a project that is interdisciplinary and high-performance.
